ELECTRONIC LOCKING  
AND ACCESS CONTROL  
SPECIALISTS

# A PASSION FOR LOCKING

## WE INNOVATE. YOU BENEFIT.

We strive to perfect the most reliable, secure and user-friendly electronic locking and access control solutions.

A tailored solution, no matter its type or size, works for many reasons, such as system scalability, seamless integration with third-party systems, security, multilanguage option, to name just a few.

That's why your visitors, employees or students can use it daily and do not get distracted from what is important for them - be it relaxation, enjoyment, study or work.

# METRA SOLUTIONS

## SECURE & EASY STORAGE LOCKING

The Metra storage locking solution ensures that locker users' belongings are secure whilst they work, study, visit or enjoy other pursuits. Forget about maintenance staff, replacement keys, "hijacked" lockers and other unnecessary time- and money-consuming problems.

## COMPLETE SOLUTION WITH ACCESS CONTROL

The Metra comprehensive solution for leisure and sport facilities combines RFID access control, electronic locking for lockers, cashless vending and locker rental / management software. It can be seamlessly integrated with third-party systems.

## COST OPTIMISED DELIVERY LOCKING

Cut your delivery costs and errors, offer 24/7 pickup for customers and optimise your delivery processes. The Metra delivery locking solution can boost your revenue and offer your customers a time-saving service and a user-friendly shopping experience.

## METRA OEM FOR IOT SOLUTIONS

Metra OEM components are meant for IoT usage. Take advantage of the possibility of unleashing their full potential with custom software integration and fully tailor the locking solution to your specific wishes, needs and requirements.

# METRA DIVERSITY

## THE WORKPLACE

The world's leading companies, factories and organisations use and trust Metra on a daily basis with innovative electronic storage locking solutions for their employees, mail distribution, office sharing, hot desk services and others.

## EDUCATION

Every day, thousands of pupils and students around the world entrust Metra storage locking solutions to safely and hassle-free store their personal belongings whilst they follow their dreams and pursue their education.

## RELAXATION

World-class waterparks and resorts worldwide rely on Metra electronic storage locking and access control solutions to help provide their wealthy clientele with a premier relaxation experience.

## SPORTS

Renowned ski resorts and various sports facilities use Metra solutions to provide their members and guests with impeccable functionality for indoor and outdoor storage of their various sports equipment.

# METRA LOCK FACTS

- The Metra electronic lock is motor-driven. It performs a locking and unlocking self-check cycle each and every time it is used.
- The Metra electronic lock is known for its impeccable functioning and reliability in challenging environments. From freezing  $-20^{\circ}\text{C}$  in French or Swiss ski resorts to hot and humid  $+40^{\circ}\text{C}$  in Australian or Middle Eastern waterpark resorts.
- The Metra electronic lock is design friendly, as it does not visually impair the physical locker design. All lock components are hidden from view when locker doors are closed. Locker door handles are unnecessary, as the Metra lock opens the locker door automatically (depending on the Metra lock mode). This Metra solution enables a modern, clean-line locker installation design.

# THE METRA NETWORK

## WORLDWIDE. IN AN INSTANT.

We know that with every new project unique requirements and specific needs arise. The Metra network supports our customers and partners worldwide, at every moment, from idea to implementation and beyond. No matter the complexity of challenge.

Ask any of our thousands of customers and partners worldwide.
